Dates: 21 - 24 September 2020

Times:

Monday: 11:30 - 17:00

Tuesday - Thursday: 09:00 - 17:00

Language: English

We are pleased to announce this 3.5 day course designed around the SHAPE format and aimed specifically at Keepers and Animal Caregivers, currently working with captive species. Instructors will guide participants through a process that will allow them to develop more holistic and goal oriented enrichment programs in their own facilities. The course is roughly split between lecture and practical components. Lecture topics include: Animal welfare, and an enrichment overview, including the framework, safety and evaluation. The practical components of the course will include behavioural problem solving, fire hose and rope splicing workshops, and the application of all the taught principles as participants are split into groups, allowing the opportunity to test the framework with the facilities animals. Please note you must be 18 or over to attend this course.
